

What Happens When A Plane Goes Missing? A Must See Seminar!!!

When a plane goes missing, how will it be found? or will it be found? How long will it take if it is found? How do they find it? What is the process used to find a missing plane? What can the pilot do to be found faster? Do most people survive? Why do they survive? When will they come look for me? Let's look at some recent case studies to see how we can be better prepared if it happens to me. 121.5 vs 406 ELTs. Should I have my cell phone ON or OFF when I fly? What equipment is used to find a missing plane? How good is it?

Directions: This seminar will be located in the Modern Avionics Hanger.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
